

e-education bring school into the digital era

The innovative e-education solution

SQOOL, a solution made in France and born out of the success of TED (tablet for digital education)

SQOOL, the e-education solution provided by Unowhy and Worldline, was developed from lessons drawn from the TED project, An experiment carried out as part of the French “Programmes d’Investissement d’Avenir pour le Développement de l’Economie Numérique” (investment programmes for the development of digital economy).

Carried out in 15 secondary schools in the French department of Saône et Loire by Unowhy, the leader of a consortium comprising the Conseil Général du 71 (a French county), Rectorat de Dijon and the Editis Group, TED addresses over 8,000 pupils and is the biggest digital education experiment ever carried out in France to this day.

Enter the digital education era with our complete digital ecosystem

Tablet and interface for a school environment

Open, controlled platform with digital educational applications and resources

Protection against all commercial activities

Secure, cloud-based hosting solution

With SQOOL, digital technologies easily integrate into existing systems and equipment

It is available as a comprehensive package or as modules:

- Tablets and accessories: cart, cases, headphones...
- “Digital Working Environment” functions
- Support: training and project management
- Cloud - online services
- Logistic services: on-site configuration and delivery

Customizable and flexible, the SQOOL solution fits both primary and secondary schools.

SQOOL is an alternative to traditional systems. It is designed for any user and is suitable for all school levels.

A dedicated education solution designed with and for teachers

- Easy to use
- Dedicated interface for managing multiple tablets
- Access to digital educational resources and applications
- Class preparation software

A tablet suitable for school environments

- Light and easy-to-handle to make pupils' school bags lighter
- Technical characteristics (robustness, size, memory...) calibrated for educational use: reading manuals, teacher-pupil interactivity, etc.
- Same technical specifications and ease of use as consumer tablets

A protected digital environment

- An educational space protected from all commercial activities
- Secure Internet access that notably protects pupils from inappropriate content

An open, controlled environment

- Adapts to the specific characteristics of each school, notably its Internet connection bandwidth
- Optimum connectivity and compatibility with equipment already installed

Secure, durable hosting in France

- Secure cloud-based hosting located in France
- The hosting of pupils' personal data complies with the security requirements of ANSSI and CNIL (*French agencies in charge of information security and data protection*).

Technical specifications

- 1.9 GHz Cortex A15 quad-core processor
- Operating system based on a forked Android (i.e. a controlled environment that is compatible with Android resources)
- 10.1" IPS screen with 16:9 ratio / 10-point capacitive technology / Resolution: 1280x800
- Battery life: 8 hours
- External interfaces: micro USB, micro SD, Full-HD HDMI
- 16 Gb of internal memory, SD card slot (up to 32 Gb)
- Wireless connection: Wi-Fi 802.11b/g/n, (Ethernet with adapter)
- Sensors: GPS, 3-axis accelerometer, microphones, cameras (Front: 1.2 MP - Back: 5 MPs)
- Audio: 3.5 mm jack with built-in speakers
- Size: 290 x 210 x 8 mm / Weight: 690 g / Folding stand

About Unowhy

Unowhy is a digital media company that designs and manufactures multimedia products, content and services with high added value. SQOOL is a digital solution dedicated to education resulting from a partnership between Unowhy and Worldline. By combining dedicated touch pads and interface, secure data hosting and easy access to digital educational resources, SQOOL is a complete and customized ecosystem that can meet all the needs of e-education.
